

IX. System Performance Indicators and Data

Introduction

This chapter presents the set of system performance indicators, adopted by the MPO in 2009, and the data relevant to the indicators. The purpose of the performance indicators is to provide some quantitative evaluation of the ability of the urbanized area to move toward the goals stated in the plan (Chapter VI - Goals and Objectives). The indicators, at this time, are not tied to any specific performance goals and are only intended as a planning tool.

However, the last federal transportation bill, Moving Ahead for Progress in the 21st Century (MAP-21), initiated the process of establishing a performance- and outcome-based program. The objective of this performance- and outcome-based program is for States and MPOs to invest resources in projects that collectively will make progress toward the achievement of the national goals. Those national goals are:

- Safety
- Infrastructure condition
- Congestion reduction
- System reliability
- Freight movement and economic vitality
- Environmental sustainability
- Reduced project delivery delays

Within one year of the U.S. DOT final rule on performance measures, states are required to set performance targets in support of those measures. States may set different performance targets for urbanized and rural areas. Within 180 days of states or providers of public transportation setting performance targets, MPOs are required to set performance targets in relation to the performance measures (where applicable). To ensure consistency, each MPO must, to the maximum extent practicable, coordinate with the relevant State and public transportation providers when setting performance targets. These measures and targets will be set and in use as federal and state rules and guidance are finalized.

Performance Indicators

1. Safety

Streets and Highways

Indicators: Total Crashes, Total Fatal Crashes, Total Severe Injury Crashes
 Data Source: WisTransPortal – the WisTransPortal Project
 Crash reports and summaries (MV400) web application

	2008	2009	2010	2011	2012	2013	2014

Total Severe Injuries (incapacitating)	71	71	71	56	47	51	42

2. Accessibility and Mobility of People and Freight

Streets and Highways

Indicator: Level of Service, Base Data 2010, from roads in network, Directional miles
 Data Source: WisDOT – Traffic Demand Model for Chippewa-Eau Claire MPA

Level of Service category and description	Mileage
A, B, C – Stable traffic flow with possible slight delays and/or impedance	1,172.3
D – High density of vehicles with stable but slower traffic flow	1.5
E – Operating conditions at or near capacity; unstable flow	0.0
F – Forced flow, breakdown conditions	0.0

Indicator: System mileage: Chippewa -Eau Claire Urbanized Area – Urban Road Miles by Functional Classification, Center line miles
 Data Source: WisDOT

Functional Classification	Mileage	Percent of Total System
Interstate Highway	13.38	1.6%
Principal Arterial	79.40	9.3%
Minor Arterial	78.55	9.2%
Collector	124.32	14.5%

4. Efficient Management and Operations

Streets and Highways

Indicator: Deficient directional miles, based on Level of Service (LOS) determinations for base 2010 model network

Data Source: WisDOT Traffic forecasting section – Travel demand model output
Base Data:

Chippewa Eau Claire MPA Base Network – 2010	
Directional miles LOS A, B, C “sufficient”	1,172.3
Directional miles LOS D “approaching deficient”	1.5
Directional miles LOS E “potentially deficient”	0.0

Directional miles LOS F “deficient”	0.0

Indicator: Hours of congested travel

Data Source: WisDOT Traffic forecasting section – Travel demand model output
Base Data:

Chippewa Eau Claire MPA Base Network – 2010
Hours of congested travel per average weekday - 1,416.2

Transit

Indicator: Passengers/revenue hour of operation, passengers/revenue mile of operation, passenger miles traveled, number of passenger trips
 Data Source: National Transit Database (NTD), or providers (*uses unlinked passenger trips, passenger miles, revenue hours, and revenue miles by system*)
 See previous data regarding transit operations.
